# Mission Control

From the Mission Control tab you can send your fleets on missions.

1. Choose the fleet that you want to send on a mission;
2. Select the destination, by either selecting one of your favourite destinations or entering the coordinates manually;
3. Select the mission that you want to perform;
4. Click "Go on Mission", this will open a popup;
5. Configure the velocity of the fleet;
6. Setup the fuel that your fleet will require to travel until its destination;
7. If you're doing a transport mission, you can also select the cargo that you'll be transporting;

MISSION DETAILS

Attack

You can only place attacks on settlements colonized by other

Remember that the fastest your fleet travels, the more fuel it will require, yet, when travelling through space, keep in mind that planets position is dynamic. Each planet has a velocity too and you need to take this into consideration when selecting the velocity of your fleet.

# Radar

From the radar you can find nearby settlements, planets and fleets that are on their way to missions.
