

Mission Control

From the Mission Control tab you can send your fleets on missions.

1. Choose the fleet that you want to send on a mission;
2. Select the destination, by either selecting one of your favourite destinations or entering the coordinates manually;
3. Select the mission that you want to perform;
4. Click "Go on Mission", this will open a popup;
5. Configure the velocity of the fleet;
6. Setup the fuel that your fleet will require to travel until its destination;
7. If you're doing a transport mission, you can also select the cargo that you'll be transporting;
