Honourable Mentions

A special thanks to everyone that has contributed to Cosmo Crafter.

- The Founder
- Special Thanks
    - To Martin, my loving partner
- The Technology

The Founder

Cosmo Crafter was created by João.

João’s a software engineer with over a decade of professional experience, and has worked on exciting projects such as the platform of the Worten Game Ring, that held over 50K users, the Criminal Record Portal that allowed Portuguese Citizens to skip the queues and ask their Criminal Record online, amongst other platforms for managing customer marketing campaigns to a full-fledged, AI-powered recruitment platform, EasyApply.

It has been João’s dream to build a game like Cosmo Crafter for more than 15 years. Back in 2023, João finally set himself on the quest to “just make it happen”.

Special Thanks

By João

I’m appreciated for all the help I’ve been given, and a special thanks to those who have been by my side on the journey of Cosmo Crafter is due.

To all my friends that have supported my passion for technology and for browser games.

To my family that made accessible my first computer, that drove my passion for technology, games, and programming. This inspiration led me to hone the skills required to make a game like Cosmo Crafter a reality.

To the player @kiara who has been of great assistance improving our Discord.

Special Thanks

To Martin, my loving partner

Martin has one of the most challenging roles: to listen to me talking about the programming, the game mechanics, the challenges, the solutions and everything that entails with the conceptualisation of Cosmo Crafter.

The Technology

We use OpenSource technologies for most of our operations. We are thankful for all the hard-work the community puts on these powerful tools that allow us to deliver more, with less.
